

Question 8: Are you in favour of continuing the test on the use of locational products for balancing GRTgaz until a single marketplace is created (November 2018)?

I am in favour, however I have also argued in the past that it would be a lot more flexible and beneficial to GRTgaz to allow Running Hour + 3 instead +2. Also if one was given 1.5hours to nominate instead of 1 then again this provides more flexibility as Within Day capacity can be obtained to help the TSO balance the system.

Markets would increase in competitiveness and thus TSO able to save on costs.
